

Matthew Huffman

Email: matthewhuffman841@gmail.com

Objective

Physics graduate with hands-on experience in Python, instrumentation, and scientific programming.

Education

Bachelor of Science in Physics, Magna Cum Laude

May 2025

Minor: Mathematics

Biola University

La Mirada, California

Experience

Undergraduate Research Intern

June 2024 – August 2024

Brookhaven National Laboratory

Upton, New York

- Developed a machine learning pipeline in Python (TensorFlow, Keras) to increase the rate of analysis of environmental TEM data, achieving an analysis rate of ~20 ms/image.
- Trained and evaluated an image segmentation network using basic software design and analysis tools while analyzing software output and resolving technical problems in a real-time test environment.
- Generated technical documentation and presented project progress in verbal and written form and wrote clear, documented code in a research environment.
- Effectively communicated plans, status, and issues to program leadership and research scientists.

Space Program Engineering Coach

August 2025 – February 2026

Veritas Classical Academy

Fullerton, California

- Guided a student team through the design, development, and iterative testing and troubleshooting of hardware and software systems intended for deployment aboard the International Space Station.
- Worked with instrumentation, measurement systems and structured test procedures to improve functionality and ensure compliance with detailed safety standards.
- Generated comprehensive design documentation detailing components, functionality, and issues.

MESA Physics Tutor

August 2025 – May 2026

Cypress College

Cypress, California

- Communicated complex technical concepts clearly in one-on-one and group settings and promoted team cooperation.

Skills

- **Technical:** Python, MATLAB, C++, Git, Arduino, Linux | NumPy, Pandas, Matplotlib, Scikit-learn | TensorFlow, Keras
- **Technical Strengths:** Working knowledge of basic lab/test equipment, data analysis, technical documentation, structured test procedures, troubleshooting
- **Professional:** Excellent oral and written communication skills, detail-oriented, teamwork skills
